

### Logging on to Chemwatch

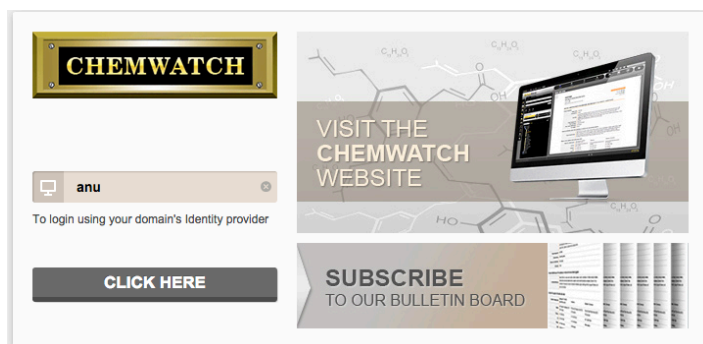

ChemWatch is a database holding a large number of vendor safety data sheets (SDS) and their own “Gold SDS” compliant with Australian Legislation. Chemwatch is also the commercial provider for ANU’s chemical inventory, and it allows printing labels easily.

1) Access the login page by following the link <https://jr.chemwatch.net>

2) In the “account” field, type “anu” and click on “Login”

3) The login window will be reduced to a single data entry line. Click on “Click Here”.

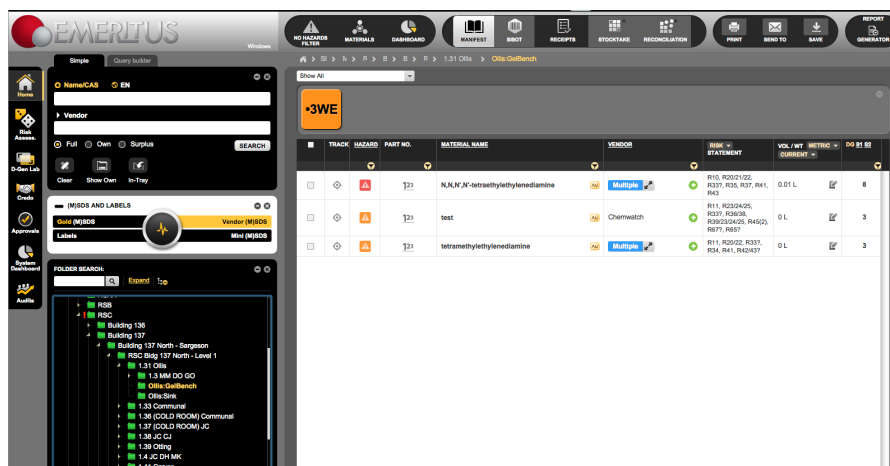

4) This brings you to the ANU’s single sign on page. Use your u-number and HORUS/ISIS password to sign in.

5) Based on your level of access, you will have access to RSC's chemical inventory, ChemWatch's label generator, the Credo module of generating chemical mixtures, etc.

Note: on your first login you will be set to the default access level, which is SDS access only. If you need higher access (e.g. access to your group's inventory), please talk to the RSC WHS Manager.

TRACK	HAZARD	PART NO.	MATERIAL NAME	VENDORS	RISK STATEMENT	VOL/WT METRIC	DO	SI	SS
		121	N,N,N',N'-tetraethylthylenediamine	Multiple	R10, R02(1/2), R23, R33, R37, R41, R43	0.01 L			8
		121	test	Chemwatch	R11, R23(4/25), R33, R36(8), R39(24/25), R45(2), R67, R69(7)	0 L			3
		121	tetramethylthylenediamine	Multiple	R11, R20(2), R37, R38, R41, R42(4/37)	0 L			3
