Cancellations must be made in writing to the
Bridging Course Coordinator by Friday 31
January 2020.

This course specifically targets high school and college level students who wish to strengthen their chemistry knowledge with the aim of pursuing first-year university chemistry. It aims to lay a good theoretical and practical foundation for first-year chemistry studies. Undergraduates or graduates who wish to improve their knowledge of chemistry may also enrol, and will benefit from the course structure and principles.

The course will focus on the fundamental principles of chemistry. The topics covered will include the study of atomic structure and periodicity, chemical bonding, nomenclature, the mole and stoichiometry, equation writing, and simple organic compounds. Students will also have the opportunity to develop some essential laboratory skills.

The course consists of eight days of lectures, tutorials and laboratory sessions. It will be held from Wednesday 5 February to Friday 14 February 2020 (weekdays only) in the Research School of Chemistry, ANU.
